Hon. Committee on Streets, Sewers, etc.

Gentlemen: The matter of locating the highway leading from the east line of Section 27, T. 48 N. R. 25 W. has been referred to me by the commission on streets, sewers, etc., as affecting traffic to the dump ground. A survey was made four years ago, and recent measurements show that a fence has been built on the north side of the center of the traveled road at distances from 5 to 10 feet, leaving a narrow alley between this fence and the old fence on the south side insufficient for the passage of teams.

The commission asks that steps be taken to define the location of the road at a legal width. I herewith submit a

Marquette, Mich., Dec. 4, 1912.

To, the Recorder of the City of Marquette.

Sir, I herewith return, without my approval, the ordinance adopted by the common council on December 7, 1912, entitled: "An ordinance relative to, meat and meat supplies."

My objections to this ordinance are as follows:

1. It provides for two inspections of cattle, one before and one after the killing; whereas, in my opinion but one inspection is necessary, viz: That of the meat after it has been slaughtered.

2. It would be a hardship on farmers who may desire to kill their cattle and sell the meat in this city and would be an injustice to them.

3. It would result in increased cost of living to the inhabitants of this city.

Respectfully,

John H. Jacobs, Mayor.

EASTERN

TRUNK SEWER

The following was presented and ordered placed on file:

Marquette, Mich., Feb. 15, 1913.

To the Honorable Mayor and Common Council:

Gentlemen - In the matter of confirming the roll for the new Eastern Trunk Sewer, which forms a by-pass to the present trunk sewer from beginning to end, reasons therefor may be plainly stated and as plainly understood.

The necessity for adding to the capacity of the old sewer has been apparent for over ten years. Adjacent cellars have been flooded and manholes have overflowed.

Six or seven years ago, steps were taken in that direction, but action was deferred in prospect of a possibility of providing a cheaper proposition by means of an outlet near Picnic Rocks, after the water works intake should have been extended. Since such extension has been accomplished, repeated attempts have been made to force an outlet near the rocks and a very inexpensive and practicable proposition was presented early last summer but condemned for sanitary reasons.

Now the last resort has been adopted by way of a detour from the entrance of the old trunk sewer to the present outlet taking in territory not heretofore covered. This addition of new areas has necessitated increased cost of construction by reason of requiring a deeper sewer, but such additional expense has been estimated and assessed against property in the district benefited. And it should be thoroughly understood that property in the former districts heretofore paying for the old trunk sewer is assessed only what it would barely cost to provide necessary additional capacity, regardless of the new district included.

Respectfully,

Charles Cummings,

Acting City Engineer.
