To the Hon. Common Council:

Gentlemen: Referring to an engineer's report adopted September 3, 1912, and shown herewith, in which the extension of the Presque Isle avenue sewer from the flush tank at the south end to the present manhole in Specular street was recommended, I would further report in favor of additional extension to Park street for the purpose of excluding the bulk of the sewage of the Palmer Addition from the North Marquette sewer and taking only the water from the cemetery that is desirable for use in the flush tank.

I would also recommend that the pipe thus laid be 12 in size to furnish an adequate storm sewer for protection of the streets along its line from further damage by flooding; the flow of water in the sewer to be so controlled that an excess can be diverted from the flush tank to the Eastern Trunk Sewer.

I herewith present a profile of proposed sewer for adoption.

Charles Cummings.

DRAINAGE AND
SEWAGE FROM
NORMAL SCHOOL
ENTER FLUSH
TANK.

The following was presented and referred to the committee on parks, cemeteries, streets and sewers:

Marquette, Mich., August 4, 1913.

Common Council of City of Marquette.

Gentlemen:- The matter of collecting surface water at the Normal School and discharging that and a certain amount of sanitary sewage into the city sewers has been brought to my attention by the architect of the institution. Ample bathing appliances are to be installed and a flow of water may be expected sufficient, perhaps, to provide necessary flushing for the North Marquette sewer.

I would, therefore, recommend that this drainage and sewage be permitted to enter the flush tank.

Respectfully,
Charles Cummings,

FRESQUE ISLE

LANDING.

The following was presented:

Marquette, Mich. August 4, 1913.

Common Council of the City of Marquette.

Gentlemen:- In placing the Presque Isle landing heavy boulders have been encountered, and much difficulty met in consequence. heavy expense would be incurred in setting the piers at the depth at which rock bottom was reached with a sounding rod.

I would therefore recommend that the cross bracing belowed, if necessary to take the floor beams and that they be bolted to the sides of the piers instead of the top as shown on plans adopted by the council.

Would further recommend that a floor system of iron rods and heavy wire mesh be substituted for plank.

Respectfully,

Charles Cummings.

Moved by Alderman Schauer, supported by Alderman Mellin, and carried unanimously, that the recommendations of Charles Cummings be adopted.
