may be required or advisable in the opinion of said board in order that the disposal of sewage shall be sanitary and not detrimental or dangerous to the public health; and

Whereas, Considerable trouble has been experienced with the sewage disposal system of this city in case of heavy storms owing, in part, to the fact that many sewers were built too small to dispose of storm water, and the time has arrived when extensive improvement and additions to the sewage disposal system of the city is necessary; and

Whereas, Should this city proceed to carry out general and extensive alterations and additions to the present sewage disposal system of this city without having first procured the consent and suggestions and directions of the State Board of Health in respect thereto, such improvements, when completed, might result in the approval of said Board of Health, in which case the city might be required by said Board to abandon, or rebuild or alter the same, or parts thereof; and

Whereas, Pursuant to said act the State Board of Health has appointed and now has in its employ upon an annual salary, a sanitary engineer known by the title of State Sanitary Engineer, who is required by said act to give his full time under said board of Health to the visitation, inspection and investigation of the water works systems, sewage disposal systems and garbage systems in the cities and villages of this state and to such other matters as the State Board of Health may direct;

Resolved, That the State Board of Health be hereby requested to make, or cause to be made by the State Sanitary Engineer, immediate and thorough examination and inspection of the present sewage disposal system of this city, and the future needs of the city in respect to sewage disposal; and that said board be authorized such recommendations, orders, rules and regulations for the alteration, extension and improvement of such sewage disposal system as may be required or advisable in the opinion of said board, after
