MAYOR RETURNING

WITHOUT HIS

APPROVAL "AN

ORDINANCE RELA-

TIVE TO THE EM-

PLOYMENT OF

LABOR UPON

PUBLIC WORK

The following was presented, read and ordered placed on file.

Marquette, Mich., Nov. 9, 1900.

Daniel S. Souovan, Esq.,

Recorder, of the City of Marquette.

Sir:-

I return herewith without my approval an ordinance entitled, "An ordinance relative to the employment of labor upon public work."

This ordinance provides that upon all work done for the City upon contract or otherwise, those employing labor shall discriminate in favor of those inhabitants of the City who are full citizens of the United States, and against all others.

My reason for not approving this ordinance, aside from its doubtful validity, is that it will work injustice to

those inhabitants of the city of foreign birth who have come here to make their homes, but who have not been here long enough to get their full citizenship papers.

It is against the spirit of our institutions to deny to any law abiding inhabitant of this country the equal right to live, and when a man has left his native land forever, to make his home with us, he is entitled to an equal chance with other men to make his living. The public authorities, representing as they do, all the people, should least of all discriminate against the man who has come here to be one with us and deny to him the equal opportunity to labor for the support of himself and family.

Very respectfully,

J. P. Heidbork
Mayor.

Alderman Stevens presented the following report from Charles Cummings, surveyor:

Marquette, Mich., May 28th 1900.

Hon. W. J. Stevens, Chairman, Common Council Committee on Railways and Public Conveyances.

Dear Sir: In compliance with the instructions of your committee, I have surveyed, located and monumented according to the original plat the line of Lake street from the west line of Walnut street to a point opposite the old Rolling Mill a short distance south of Hampton street, and have noted the encroachments and obstructions in said street.

The following is a description of the center line to-wit: Commencing at the point of intersection of the center of said Lake street and the west line of Walnut street produced southward, which point is 90.2 feet south of

of the intersection of the south line of Ridge street with the west line of Walnut street; thence south 78 degrees 35 minutes west 355 feet; thence south 77 degrees 5 minutes west 256 feet; thence south 69 degrees 58 minutes west 163 feet; thence north 88 degrees 45 minutes west 450 feet; thence south 83 degrees 15 minutes west 350 feet; thence south 88 degrees west 950 feet; thence south 63 degrees 45 minutes west 215 feet; thence south 77 degrees 25 minutes west 657 feet; thence south 17 degrees 45 minutes west 654 feet to the south line of Superior street; thence east 8 feet; thence south 6 degrees 45 minutes west 232 feet; thence south 71 degrees 50 minutes west 1401 feet; thence south 55 minutes west 725 feet; thence south 14 degrees 40 minutes east 609 feet; thence south 17 degrees 50 minutes east 448 feet.

From Walnut street to Superior street, Lake street is 50 feet wide and south of Superior street it is 66 feet wide. Monuments consisting of one inch round iron bolts 30 inches long were driven at each angle point in the center of the street. A map of the survey and the adjoining tracks, buildings etc., has been prepared and a blue print accompanies this report.

The encroachments on the street shown on the map consist of -

1st. A stone wall and fence built by Mr. Peter White along the rear of his property. The wall is indicated on the map by a dotted line which shows that between lots 16 and 22 nearly the entire north half of the street is occupied.

2nd. The side track of the Duluth, South Shore and Atlantic Railway, laid under an ordinance of 1869 requiring that a space of 30 feet for Roadway and 10 feet for side walk, or 40 feet in all, be left clear on the west and north side of the street. Said track encroaches on this space at several points along the street as shown on the map, to wit: from a point at the Railway Company's track scales northward to Superior street; from Superior street to Main street and from a point opposite lot 2 of Hewitt Addition to opposite lot 16 of said Addition.

3rd. The stone abutment at Superior street encroaches on both Lake and Superior streets.

4th The approaches to Ore Dock Number 1 and Ore Dock Number 4 are supported by bents of piles and

timber placed in the street.

5th. The platform weighing scales of Rickards & Company located a short distance north of Superior street are built almost entirely in Lake street.

These are all the encroachments that exist between the points covered by the map and survey.

Respectfully submitted,

Charles Cummings,
Surveyor.

Said report and map were ordered placed on file.
