(RELAYED TO DETROIT NEWS REPORTER JUNE 1)

MARQUETTE, Mich. - The university and the city of Marquette have been presented with ideas and recommendations of the Michigan Civil Rights Commission.

A number of these are identical with policies already established with Northern's Board of Control in its bylaws and other statutes and with the city.

In the meantime, the university and the city, individually and cooperatively, have begun to study these recommendations and suggestions, which may be new in content, and to develop an appropriate reply, followed by reports of progress to the Civil Rights Commission over the next several months.

(This information was given in response to a question by the News as to whether or not, we had in fact accepted the nine recommendations of the commission, and were only working out the methods of implementing these recommendations.)
