

[1970]

Resolved, that the Academic Senate of Northern Michigan University expresses its strong support of the actions taken by President Jamrich in response to recent events on the campus. In particular the Senate commends the President for his desire to keep all lines of communication open, his willingness to listen to opposing points of view, and his ability to encourage co-operation between the several parts of the University which are seeking common solutions to campus problems.

In times of tension when there is often a temptation to give way to the passion of the moment the President has succeeded in maintaining a rational and orderly process for examining the issues while at the same time exhibiting compassion and understanding for the serious needs which have been presented to him. It is precisely this process to which Universities are dedicated and we as faculty members commend the President for standing so firmly within this long and honored tradition.
